

RESEARCH HORTICULTURIST

The southern African citrus industry is the second largest exporter of fresh citrus fruit in the world. The industry has earned global recognition as a premier supplier of superior quality citrus fruit. Citrus Research International (CRI) aims to maximise the long-term global competitiveness of the southern African citrus growers through the development, support, co-ordination and provision of Research and Technical services. CRI currently has a vacancy for a horticulturist to conduct innovative preharvest scientific research with a view to optimising citrus fruit production and quality.

The ideal candidate would have a PhD degree in Horticultural Science (*Tuinboukunde/Hortologie*), an excellent inter-personal profile, be proficient with Microsoft Office and statistical software, and have an SA driver's license. Applications from candidates with an MSc will also be considered. The incumbent must be capable of both undertaking independent scientific research and developing a network of research collaborators.

CRI offers a favourable working environment and a competitive and flexible remuneration package.

Please submit your application and one-page CV by 8 September 2011 to:

**Ms. Jean de Gasperi,
jeandeg@cri.co.za
Fax 013 744 0578
Phone 013 759 8000**

The receipt of applications will be acknowledged but candidates who have not been contacted a second time by 19 September can consider their applications to have been unsuccessful.
